moniq.

ML evidence, with its limits.

792 train / 264 test

11 categories · Disjoint merchant families
Word uni/bigrams → logistic regression
250 correct · Raw macro F1 0.9432

Confidence policy

Below 45% → miscellaneous + review
58.71% automatic coverage on this set
Confidence is uncalibrated
Real-bank performance not measured

Synthetic English examples have correlated formatting. No production accuracy claim.

moniq.

Permission, validation, exact-cent accounting.

Gmail + privacy

OAuth code + PKCE + one-use state
Gmail read-only scope
Encrypted backend tokens
Private / public / scenario isolation

Ledger + recovery

Posted records, integer cents
Duplicate checks + idempotent requests
Audit history + compensating reversals
Circles preserves cash charge

Local owner prototype; SQLite is unencrypted. Cloud identity and security review remain future work.
